

Sunsynk Approved Installer Application

End Users often ask about local installers to ensure that the best installers are installing solar systems in their homes. For this reason, Sunsynk has collated a limited list of Sunsynk approved installers.

Sunsynk will in future look at carrying out local training and auditing the work of installers.

Sunsynk has published the names and addresses of all approved installers on their [website](#). There will be two classes of approved installers:

1. Approved Sunsynk Installer
2. Master Sunsynk Installer

To become an approved installer the minimum requirement is to of installed 10 single Inverter systems with Sunsynk inverters or 5 systems with multi-inverters.

To become a Master installer the minimum requirement is to of installed 50 single Inverter systems with Sunsynk inverters or 25 systems with multi-inverters or the equivalent mixture of both.

If you are interested in becoming an approved installer, please complete the form [here](#).
